PROFILE

Highly motivated MCA graduate with a passion for web development. Possesses proficiency in HTML, CSS, JavaScript along with a strong foundation in C++. Skilled in designing and developing user-centric web applications that prioritize both functionality and visual appeal. Eager to leverage technical expertise and strong communication skills within a collaborative team environment.

SKILLS

FrontEnd

JavaScript, HTML5, CSS

Backend

Python

Operating System

Linux, Windows

PROJECTS

Laptop Price Prediction

04/2024 – present

This project helps users find laptops within their budget. Users can specify their desired features, and the system predicts suitable laptops and their estimated prices. Built with HTML, CSS, JavaScript, and SQL, this web application leverages Natural Language Processing to understand user requirements and recommend budget-friendly options.

Digital Currency System

08/2023 – 09/2023

This Java application simplifies bank account management using the Bank system. Users can sign up, log in, and perform transactions like deposits, withdrawals, and money transfers. Built with MySQL for data storage, it offers a user-friendly platform for managing finances.

Chatting System

11/2022 – 12/2022

This project is a web application for real-time chat between multiple users. Built using HTML, CSS, PHP, and MySQL, it allows users to register, login, and chat with each other in a central location. The application provides a user-friendly interface for seamless communication.

COURSES

training in C++ Programming

06/2023 – 07/2023

CipherSchools
